Dear Hiring Manager,

 I am excited to be applying at Auticon because I believe my life experiences as a person on the autism spectrum, in addition to my core values, passions and skillsets will be a strong asset to your team. My diverse toolset utilizing Python, Pythonic libraries such as Pandas and SciKit-Learn, and database tools like Azure and SQL matches well with your requirements. In addition my undertakings on various teams to accomplish a panalopy of goals has given me the skills to adjust to the changing dynamics and processes of those environments while meeting scheduled milestones and deliverables.

In my previous experiences in projects with Aggregate Intellect, DataJam Canada and HuggingFace, I've worked resiliently and effectively with teammates coming from a full spectrum of industry experience and backgrounds, to develop data science solutions to meet client's specifications.
 While studying at Lighthouse Labs for my Diploma in Data Science, I learned in an extremely difficult scholastic regimen, where my autistic qualities were able to shine; a firm appreciation of a diversified team, relentless determination and focus, and attention to detail and error correction. All traits you list as important to be able to provide a contribution to your team.

Thank you for taking the time to review my credentials and accomplishments. I am very passionate about being a competent and contributing team player, and I hope to have the opportunity to discuss my examples in greater detail with you. I look forward to answering your questions and learning more about this position and your team.

 Sincerely,

 Jesse Passmore
