Dear Hiring Manager,

I am excited to be applying for the Alta ML intern program because I believe my core values, passions and skillsets will be a strong asset to your team. My considerable experience using Python, Pythonic libraries such as Pandas and SciKit-Learn, and database tools like Azure and SQL matches well with your requirements. In addition my undertakings on various teams to achieve a panalopy of goals to meet client or project needs has given me the skills to adjust to the changing dynamics and processes of those environments while meeting scheduled milestones and deliverables.

I am extremely eager to work for Alta ML because I too firmly believe that AI will increasingly pervade more and more aspects of human daily life, and if done responsibly can greatly benefit all people. In addition several of the projects Alta ML is involved with align well with my life learnings. As an undergrad student with an honours in law, I find the Jurisage undertaking of special interest; the power of the writ of law and prima facie existing more easily at the fingertips of anyone in the legal field heavily democratizes justice for everyone, irrelevant their economic background. Being an animal whisperer raised on a farm, pets have a very special place in my heart. Sylverster.ai's Tably has already given me incite into my effervescent, often precocious feline family.

In my previous experiences in projects with Aggregate Intellect, DataJam Canada and HuggingFace, I've worked with teammates with a full spectrum of industry experiences and backgrounds, to develop data science and deep learning solutions to meet client's specifications.
While studying at Lighthouse Labs for my Diploma in Data Science, I learned in an extremely difficult scholastic regimen. Working with many diversified peers, teachers and mentors in and outside the school were necessary to keep up with the weekly project deadlines.
All these experiences have inspired me in a firm appreciation of being a proactive team player that thrives in a diversity of skills and views, relentless determination, consistent teachability and adaptability; all traits you list as important to be able to provide a contribution to your team.

Thank you for taking the time to review my experiences and accomplishments. I am very passionate about being a highly competent and contributing team player, and I hope to have the opportunity to discuss my examples in greater detail with you. I look forward to answering your questions and learning more about this position and your team.

Sincerely,

Jesse Passmore
